SKILLS

- C
- Python
- React.js
- Node.js
- CSS
- HTML
- HTML And CSS Developer
- HTML Developer
- Ui/Ux
- Application Support

LANGUAGES KNOWN

- English (Read/Write)
- Hindi (Read/Write)
- Kannada (Read/Write)

CERTIFICATIONS

- INTERNSHIP COMPLETION CERTIFICATE

RESUME SUMMARY

I am a Computer Science student with hands-on experience developing machine learning-powered web applications. Passionate about creating innovative solutions that optimize agriculture and education, I leverage Python, Django, and React to build impactful, user-friendly software that drives intelligent decision-making and growth.

PERSONAL DETAILS

- Current Location Bengaluru
- Date of Birth October 2, 2003
- Female

EDUCATION

Graduation

- Course B.Tech / B.E. (Computer Science and Engineering (CSE))
- College Visveswaraiah Technological University (VTU)
- Score 8.8%

Schooling

- Board Name CBSE
- Medium English
- Year of Passing 2022
- Score 80%

Class XII

- CBSE
- English
- 2020
- 86%

Class X

- CBSE
- English
- 2020
- 86%

INTERNSHIPS

karunadu Technologies Private Limited | February 2026 - July 2026

- Assisted in day-to-day project development and software implementation. Worked with Python and basic web development technologies to build and test application features. Participated in debugging, testing, and resolving application issues.

PROJECTS

Crop recommendation system | April 2026 - July 2026

- Project: Crop Recommendation System using Machine Learning & Django
- Project Description:
Developed a web-based Crop Recommendation System that predicts the most suitable crop based on soil nutrients and environmental conditions. The application uses Machine Learning models to analyze inputs such as Nitrogen (N), Phosphorus (P), Potassium (K), temperature, humidity, pH, and rainfall, and recommends the best crop for cultivation.
- Key Responsibilities:
 - * Designed and developed the application using Python and Django.
 - * Performed data preprocessing, cleaning, and feature selection using Pandas and NumPy.
 - * Integrated the trained ML model into a Django web application for real-time crop prediction.
 - * Built responsive user interfaces using HTML, CSS, Bootstrap, and JavaScript.

College Finder | January 2026 - April 2026

- Project: College Finder using React, Node, CSS
- Project Description:
College Finder is a web-based application designed to help students find suitable colleges based on their academic qualifications, preferred course, location, budget, and other requirements. The system provides relevant college information and helps students compare available options, making the college-selection process easier and more efficient.
- Key Features:
 - * Search and filter colleges based on course, location, fees, and eligibility.
 - * Display detailed information about colleges and available courses.
 - * Help students identify colleges matching their academic profile.
 - * Simple and user-friendly interface.
 - * Compare different colleges based on important criteria.

ACHIEVEMENTS

- Winner in College hackathon in B.Tech / B.E.
- Department topper, Received scholarship in school
